Errare humanum est said the Roman stoic. It means that despite your experience in Forex trading, you will make a lot of stupid mistakes through your trading career. Computers are not humans, and if programmed without errors, **expert advisors will not commit any mistakes when trading.**

How it is designed?

- These robots are typically developed using specialized programming languages and certain calculations based on entry and exit conditions .
- We installed technical like MA, pivot levels, CCI strategy depends on the different timeframe.
- We take care of the drawdown which is risk free and the lot size should move more than micro lot in small accounts . Adjusting parameters and implanting additional risk management measures.
- We also provide you demo of week trading days to monitor our performance of robo.

Focus Your Time and Efforts on Running Your other Business and Leave the Trading Automation to Us.
